

The ROYAL PATENT MEDICINALSNUFF,

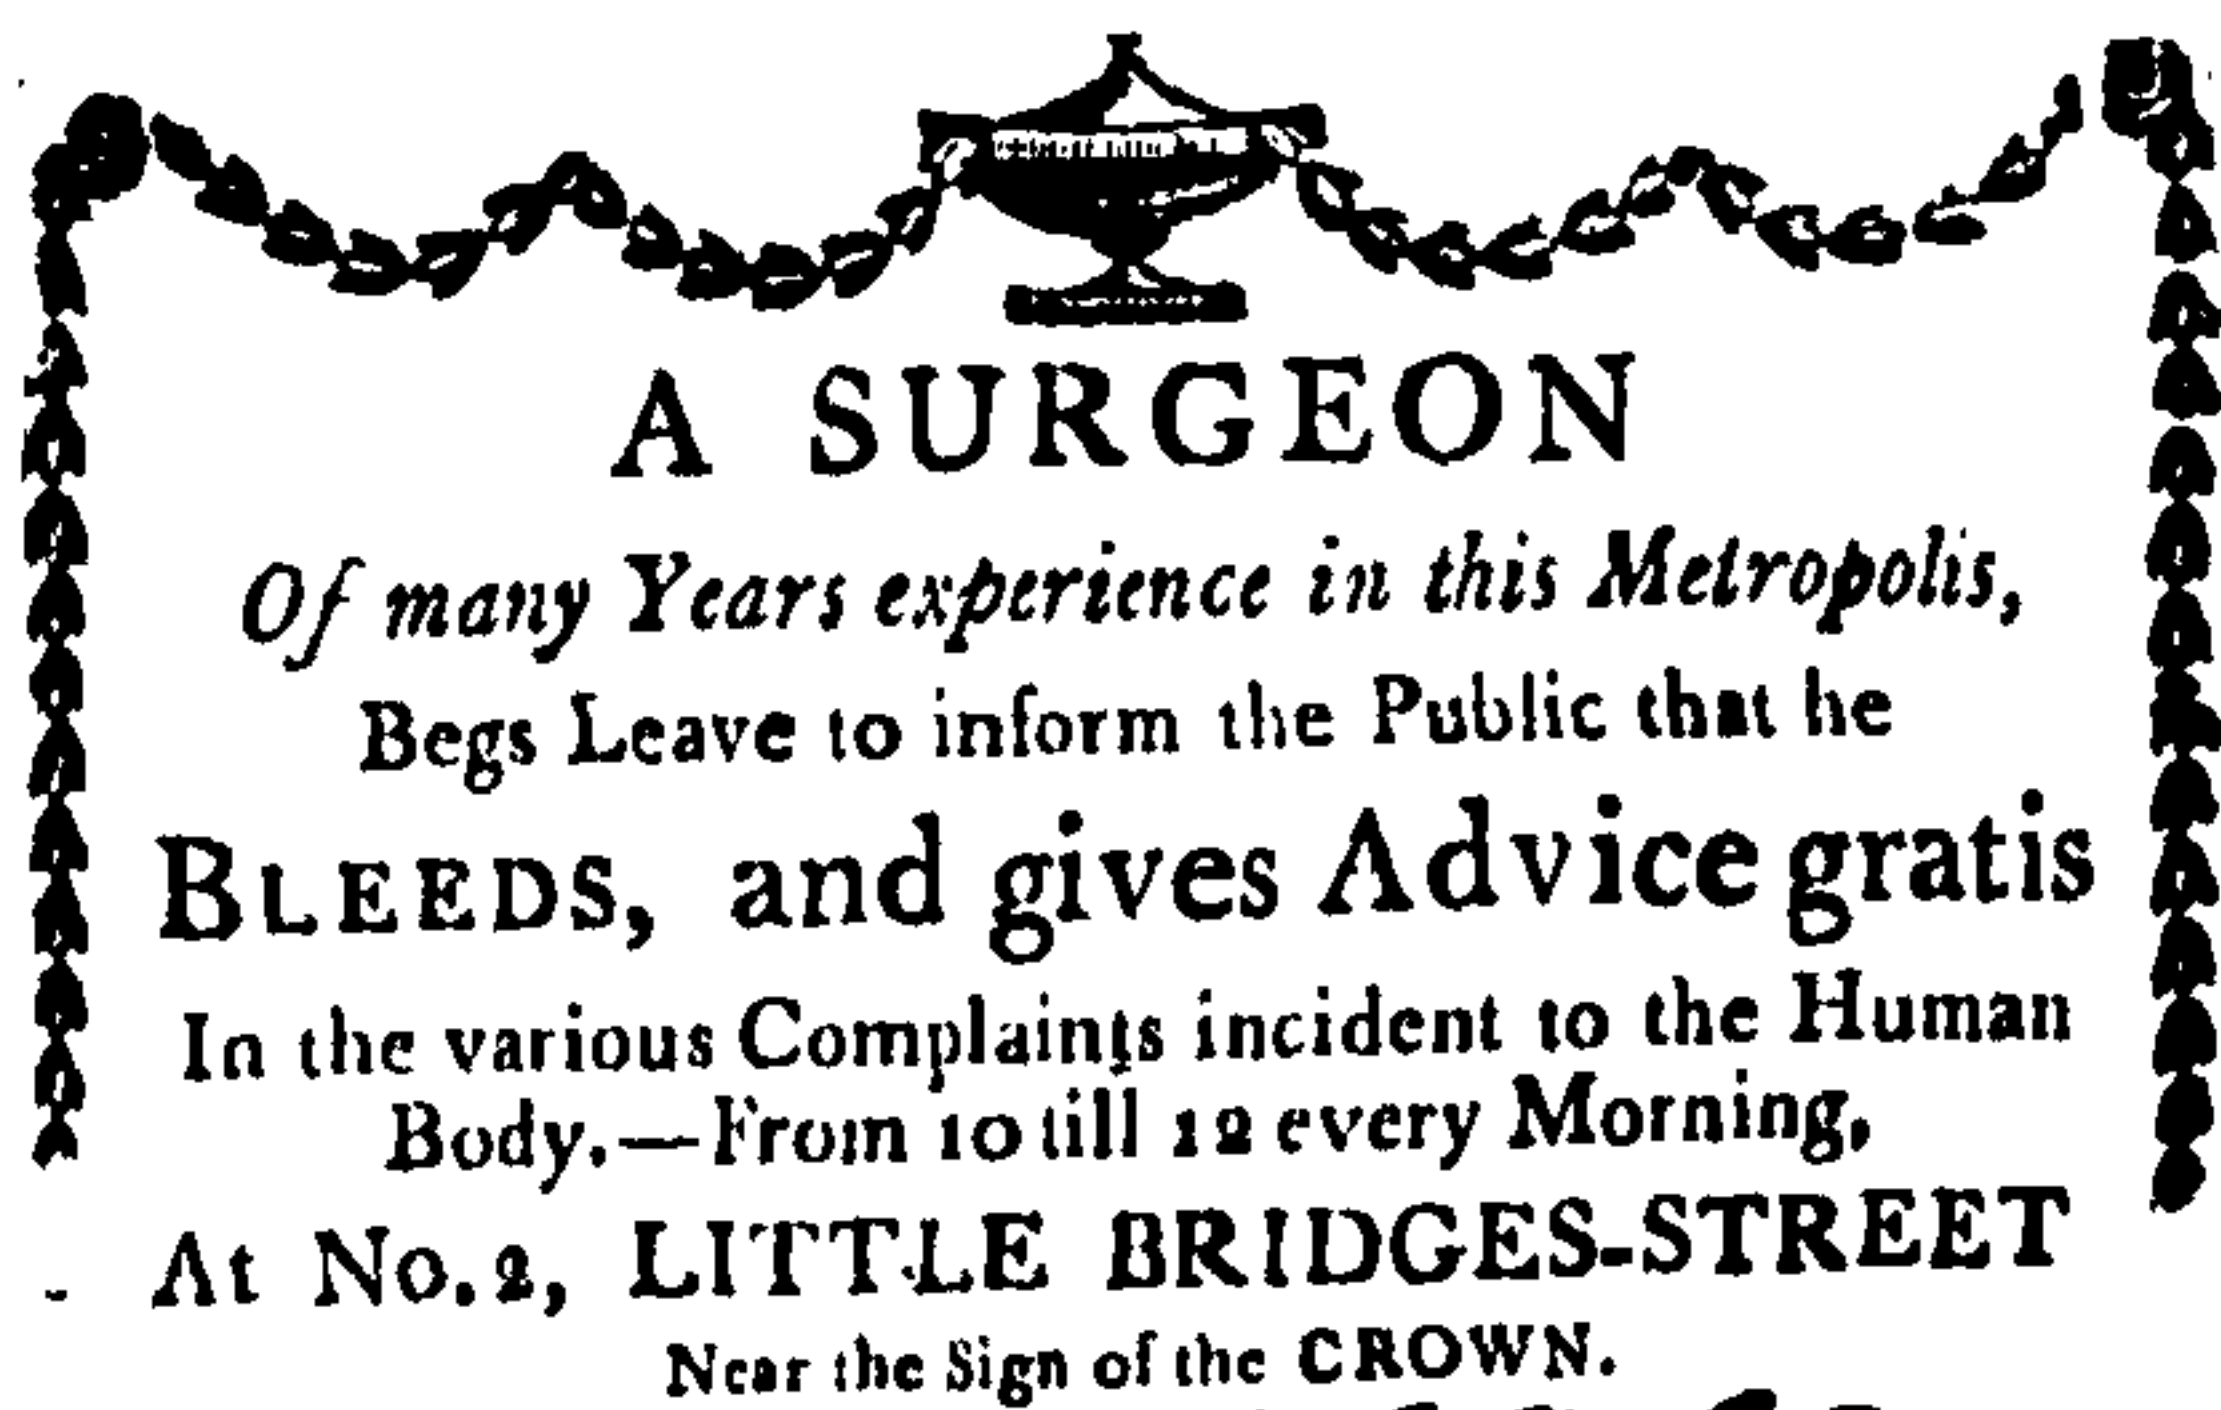

So justly famous for the Cure of most Disorders,

Sold by JOHN PAGE, at the *Black-Lion*, in *Fore-street*, near *Moorfields*, L O N D O N.

THIS excellent Medicine operates on the head as a purgative and stimulator; on the stomach and lungs as an attenuator; and on the blood and juices as an alterative. By its operations on the head it cures recent lunacies, dizziness, deafness, inflamed eyes, and defect of sight; breaks and carries off imposthumations and quinsseys; enlivens the spirits, quickening and awaking them from indolent and lethargic stupors; disperses all growing and congregated vapours, creating intense pain in any part of the head, face, or gums; and the polypus in the nose it gradually eradicates. By the like power on the stomach and lungs, it dissolves coagulated matter, formed by bad air, diseased fluids, or other casualties; thus, removing all obstructions, it suddenly relieves the asthma, catarrh, phthisic, recovers to the stomach and nerves their genial tone and action, and utterly annihilates all hysterical disorders. By its efficacious, alterative, and purifying, quality, it cleanses the blood and reins from all viscous, concrete, impurities; and remedies evil, scorbutic, leprous, humours, and pestilential fevers; banishes all relics of unskilful physicking, and re-establishes the whole animal œconomy in all their natural functions. Its singular use and excellence consist in its being pleasant in the taking, happy in the operation, and morally certain in the cure: hinders no business, eating, or drinking: nor causing, but preventing and curing, colds. The manner of its operation is various, as the habit of the body inclines, but most generally by the channel of the nose; the most ready and least disagreeable way of carrying off most obstructions; especially such as affect the head; though often by stool, urine, or gentle perspiration.

N. B. This Medicine is most usually made up, for sale, in one-shilling papers, containing 12 grains troy-weight, and is in most cases used as snuff. When applied to affections of the head, or pains or stitches in the breast or side, it is best taken as snuff, as the operation is more immediate: in other cases, it is generally indifferent whether the same quantity be taken as snuff, or, as other medicines, mixed in fair water, tea, or other menstruum: when intended as an emetic, to clear the stomach, it should be always so taken, and the same in all cholicky disorders and affections of the blood: and, in agues and intermitting fevers, best mingled in white wine; in which particular, one dose rarely fails of a cure.

☞ Merchants, and Commanders of Ships, may be supplied on the lowest terms.

A SURGEON
Of many Years experience in this Metropolis,
Begs Leave to inform the Public that he
BLEEDS, and gives Advice gratis
In the various Complaints incident to the Human
Body.—From 10 till 12 every Morning,
At No. 2, **LITTLE BRIDGES-STREET**
Near the Sign of the **CROWN**.

The months of October and November bring those, in which the generality of people experience the first symptoms of the Rheumatism and Gout, we think we cannot, at this season of the year, render those who are troubled with the above complaints a greater service, than to refer them to the real nine times dyed Blue Flannel, which is sold by R. NOTT, at No. 101, Newgate-street. What has confirmed us in this opinion is, that the article not only operates as a preventive, but likewise cures those too general complaints, which has occasioned it to be most strongly recommended by one of our most eminent Physicians.

CANCERS AND WHITE SWELLINGS CURED WITHOUT CUTTING.
L. WILLIAM AXELL, No. 1, Chapel-street, near Hampton Chapel, in the County of Middlesex, Blacksmith, was upwards of three Years troubled with Dropsy. My hand, body, hands, arms and legs were prodigiously distended; I laboured under an Asthmatic complaint and was in frequent dread of Suffocation; and was most severely attacked by the Jaundice. By these disorders, I was exceedingly debilitated, and rendered totally incapable of following my employment. I applied to several eminent Gentlemen of the Faculty, without relief, till I was fortunately recommended to Mr. ROSS, and in two Months, I received a perfect cure, the Rev. Mr. HARRISON, Minister of Hampton Chapel, will readily attest the fact. **WILLIAM AXELL.**

Sworn at Guildhall, London

W. PICKETT, Mayor.

J. An 2/1.

By his MAJESTY'S ROYAL LETTERS PATENT,
HOLLAND'S New Invented **UNDER-STOCKINGS**, to be had by appointment of the Patentee, only of

JOHN SLEATH, No. 164, Fleet-street.

These Stockings are thickened in the calf, or any other part to any degree, with an elastic substance, and have the peculiar qualities of being light, easy, and pleasant to the wearer, giving the leg so true a form, as not to be distinguished from beautiful nature.

BODILY DEFECTS arising from birth, neglect, accidental causes, or otherwise, are effectually remedied in appearance by this invention, in a mode peculiar to itself; many persons who had sought other means for relief, in difficult cases, without obtaining it in any tolerable degree, have been gratified by this invention beyond their most sanguine expectations.

PROLAPSUS VEL PROCEDENTIA ANI, &c. immediately relieved; Umbilical, and all kinds of Ruptures requiring Bandages.

Improved **PATENT TRUSSES, BELT and BAG TRUSSES**, for preservation in riding, with every other Truss now in use; Instruments to prevent the growth of deformities incident to Children, viz. Distortion of the Spine, Weakness in the Knees and Ankle; Mechanical relief for incontinency of Urine, strait Stockings for swelled Legs, Knees and Ankle Pieces for Weaknesses by Sprains, &c.

The **LOSS of LIMBS** supplied; Legs, Arms, and Hands, on a neat, light, and flexible construction.

ARTIFICIAL EYES, the lame and halt may depend on meeting all possible relief.

Ladies' **BACKS and COLLARS** of intire steel, peculiarly light, neat, and durable; Monitors, Neck Swings, Chairs, &c. **Mrs. SLEATH** attends the Ladies.

J. SLEATH gives his opinion gratis to every one; reference, if needful, will be given to many most improbable and successful undertakings. Many, too frequently, from the attendant difficulty of cases, despair of relief—and that no conception may arise in the minds of any who may choose to make trial of his abilities, he candidly declares, if he should be unsuccessful in what he undertakes, (sufficient time being first given for his experiments) he will in every such case, where relief shall be subsequently obtained through any other Mechanical Invention, withhold himself liable on-proof thereof to the charge as he engaged the relief for.

The Poor in every Case considered.
